Overview

What the area is for, equipment at a glance and who the Area Champion is.

Fiber Arts Overview

The Fiber Arts area covers textiles, sewing and leatherworking. It has sewing machines along with hand tools for fabric and leather work.

Equipment at a glance

The current list of Fiber Arts equipment is in **Atlas**: <https://atlas.waukeshamakers.com>.

No SOP pages have been written for this area yet. They will be added to the **Equipment SOPs** chapter of this book.

Before you work here

- **Corded tools require training**, sewing machines included. See **Training and Certification: How Certification Works**, and check your certifications in Journeyman at <https://journeyman.waukeshamakers.com>.
- **Inspect each machine before use**. See **Training and Certification: Pre-Use Inspection**.
- **Sharp tools**. Leather knives, rotary cutters and needles are a leading cause of small injuries. Cut away from yourself and put blades away or close them when you are done.
- **Clean up** threads, scraps and pins so the next person does not find them the hard way.

Area Champion

To be confirmed: who the Fiber Arts Area Champion is and how to reach them. See ****Volunteer Runbooks: Area Champions**** for what Area Champions do.

Classes are listed with events at <https://waukeshamakers.com>.

Equipment SOPs

One page per tool. Reading an SOP does not replace training or certification.

Maintenance

Routine maintenance procedures and checklists.
