

Wood Shop Overview

The Wood Shop is home to the saws, sanders, routers and dust collection. It is where most furniture, cabinetry, carpentry and general woodworking projects happen.

Equipment at a glance

The current list of Wood Shop equipment, with locations and which tools need training, is in **Atlas**: <https://atlas.waukeshamakers.com>. We link there instead of listing tools here so the list never goes stale.

Tools with an SOP page in this book:

- **Wood Shop: Radial Arm Saw**

Before you work here

- **Every corded tool requires training** before you use it. See **Training and Certification: How Certification Works**, and check your certifications in Journeyman at <https://journeyman.waukeshamakers.com>.
- **Inspect each tool before use.** Our tools may be modified. See **Training and Certification: Pre-Use Inspection**.
- **Eye and hearing protection** at a minimum. See **Shop Safety: Personal Protective Equipment**.
- **Use the dust collection.** See **Shop Safety: Air Quality**.
- **Clean up** sawdust and offcuts when you are done. Dust is a fire and slip hazard.

Area Champion

To be confirmed: who the Wood Shop Area Champion is and how to reach them. See ****Volunteer Runbooks: Area Champions**** for what Area Champions do.

Questions about the Wood Shop can also go to **#general** on Discord.
